SKILLS

Languages Python, JavaScript, C++, Swift, C, Visual Basic, HTML/CSS, Java, C#, Bash
Tools Node.js, Django, React.js, Docker, Git, Keras, Ubuntu, Xcode, MongoDB

EXPERIENCE

Blackberry - QNX

Ottawa, Ontario

Software Engineering Student - Open Source

May 2018 - August 2018

- Initiated dockerized licensing system with **Django** to streamline certifications, cutting time-spent by **90%**
- Designed weighted **association rule machine learning** classifier to reduce false positives in open source software licensing prediction model by **30%**
- Built data pipeline in Luigi aggregating **40k** entries to train models in batch processes
- Integrated **microservice** architecture using **Kafka** streams achieving latency reduction in inter-application communication by **95%+**
- Implemented scalable search indexing with **elasticsearch** to visualize analytics intelligence

WATonomous

Waterloo, Ontario

Full-Stack Development Lead (www.watonomous.ca)

October 2017 - August 2018

- Led the development of the main WATonomous website with **React.js** with **2000+** monthly visitors.
- Constructed backend server with Node.js and Express.js to process file transfers with **MongoDB**
- Initialized deployment and integration of a **Django**-based applicant interface for **300+** users
- Containerized production site in **Docker** with SSL and Nginx optimization for **300%** speedup

Ciena Corporation

Ottawa, Ontario

Embedded Software Intern

July 2016 - August 2016

- Used hierarchical meta-data to classify and detect anomalies in external packages with **Visual Basic** improving compliance efficiency by **200%**
- Crawled remote package repositories to predict URLs for **2100+** licenses from **80+** sources
- Designed section of Ciena's intranet with **Angular** and **D3.js** to display weekly data for analysis

PROJECTS

Recycle Can - Creator and Developer (www.recyclecan.ca)

June 2017 - December 2017

- Assembled built-in real-time iOS navigation app with over **18000+** lifetime users using **Swift** to guide users to the closest electronic waste recycling centre
- Constructed website supporting Google Maps API using **React.js** accepting **1500+** peak monthly visits

HeartBit - Developer - Hack The North (www.github.com/EdwaRen/heartbit)

July 2017 - August 2017

- Developed coaching app that tracks emotions with **OpenCV** and **Tensorflow** to improve user confidence

ACHIEVEMENTS

HeartBit - Canadian Special Forces winning hack (2018)

Recycle Can - Featured nationally on [Metro News](#) (2017)

University of Waterloo President's scholarship of distinction (2017)

International Baccalaureate Diploma (2017)

SHAD Alumnus - University of Saskatchewan (2016)

EDUCATION

University of Waterloo

2017 - April 2022 (Expected)

Candidate for Bachelor in Software Engineering
